

I Found Love

Barry White

Since the beginning of time, men have been finding things
Man has found knowledge and wisdom, and man is still trying to
find himself
But among those great findings, baby I want you to know that I
found something too
Baby, I found love... when I found you

One is a lonely number
Sometimes it's lonely and blue
One really needs, really needs someone
Girl, I found you
I really do believe I found love
Darling I, I found love

Two is a lucky number
But only when it's me and you
Ain't it wonderful, girl, to know
Dreams really do come true
You better believe that I found love
Ooh, yeah yeah

I... I found love

How lucky can two people really be, I mean...
How much of it is luck, and how much... how much is destiny?
It seems to me, girl, like we found the perfect number to make
our life complete
Two - that's me, baby, that's you
Two... two

Three is one too many
There's only room for two
You're the one, you're the one for me girl
And I'm sho-nuff the one for you
You better believe that I found love
I swear to God, love fills my heart

Darling I, I do believe that I found love
Girl I swear, I swear, I swear
I do believe that I found love
I... found love
You better believe that I found love
Found love
I... girl I found love
