

# Restart

## Bars and Melody

Outta my mind, I'm outta my head  
It's outta control, can't get outta my bed  
I'm outta my mind right into your heart

Got me feeling off somehow  
If you don't know me by now  
She'll never ever know me  
The bad weather that you show me  
Even if you really wanted me back  
There's nothing to put us back on track now

Who are you to judge me now  
Who are you to judge

Take me to your castle underneath the moonlight  
Baby take me back when everything just felt right  
Shawty I remember that I know you remember that  
You were my girl, now you're not and I want you back  
Take me to your castle I can be an asshole, yeah I know  
For you're so cold, and I know you think it's funny though  
Look so sorry but baby you've got a cold heart  
I don't know what to do, is there a way to restart

Outta my mind, I'm outta my head  
It's outta control, can't get outta my bed  
I'm outta my mind right into your heart  
I don't know what to do, is there a way to restart

Got me feeling off somehow
