

# Wheels

**Bart Crow**

Hey I used to get stoned ridin section lines  
Cut my lights at the intersection  
Hell you couldn't see a thing in any direction  
For at least a hundred miles

Well the center of my world was a dairy queen  
In a small town 'round sweet 16  
Gave my innocence up to this rodeo queen  
Said she likes her horses wild

She said somewhere out there  
Your wheels gonna finally roll  
C'mon put em out there  
If you don't you're never gonna know  
Boy you gotta let em roll, yeah let em roll

Late at night dancin in a dream  
To the sound of the wind through the front door screen  
My little brother'd get scared but  
That sounds fine to me

Cause the wind was blowin my goin somewhere  
Out of that county hell I didn't care  
When you never seen nothin  
Somethin's always better out there, somewhere

Yeah and somewhere out there  
My wheels gonna finally roll  
C'mon put em out there  
If you don't you never gonna know  
Boy you gotta let em roll, yeah let em roll

Just a million miles later damn near 15 years  
I never slowed down I did it all in high gear  
Sometimes at night lord  
I catch myself thinkin 'bout back then

When the center've my world was a dairy queen  
In a small town 'round sweet 16  
Goin back to find me that rodeo queen  
Said she likes her horses wild... yeah!

Somewhere out there  
My wheels gonna finally roll  
C'mon put em out there  
If you don't you never gonna know  
Boy you gotta let em roll, yeah let em roll

Hey let em roll, let em roll, let it roll  
Yeah let roll, let roll  
Boy you better, come on home...
