

Everyday Ppl

Bas

Silence is off putting
Killing me softly and
Damn if they all looking
Fuck if they all see this
I just wanna talk to you yeah
There's nothing new here
I'm stuck to you yeah yeah
No substitute yeah yeah
You know, never lied
And I be running through the borough you know never hiding
You know where to find me
I know that's dasani
Running down your thighs
And I'll be right behind it look

I just wanna fuck no more fighting
I just wanna be where you're hiding
Maybe even just for a while
And maybe I can get in your mind
And I don't wanna talk to them lately
People's words just get me so crazy
I just wanna wait till the morning
So do you our love still adorning
I, I wanna read your mind
I wanna get so close
So close so you could I
I wanna get so close to you
Could I read your mind
(Ooooooh)

Seeing you move
When you're near me I'm blinded
The way you were made shakes me
Just who you are takes me
I feel like a dude yeah
I'm creepin up on you yeah
I'm stuck to you yeah yeah
No substitute here
I know I believe it
And you see me cos I'm sinking over what I keep
But you know where to take me
I know there's no safety in it
But I'm open to it
Right behind let's do it

Met her at the brunch
And shorty had a fatty I would've ate for lunch
That's silly but, that's how I rate the buns
Slide a plate Solange
I got my seat at the table
Slide it closer to you like I cannot break the bonds
I call the car, we skate, girl why it take so long?
(To hold you)
How it take so long?
(To hold you)
Girl why it take so long?

In just a matter of ways
I'm willing to take upon it
Take upon love
In just a matter of ways
I'm willing to take upon it
Love

I just wanna fuck no more fighting
I just wanna be where you're hiding
Maybe even just for a while
And maybe I can get in your mind
And I don't wanna talk to them lately
Peoples words just get me so crazy
I just wanna wait till the morning
So do you our love still adorning
I, I wanna read your mind
I wanna get so close
So close so could I
I wanna get so close to you
Could I read your mind
