

Gave you a chance
You got on and switched
And that make it hard to forgive
Not in my plans
I gotta admit
You tore me apart when we calling it quits
I needed a change
You brought it on quick
I'll make you a martyr for this
Don't you turn into apologist
I've been going so much harder since
Audemar wrists
And my car is a grip
All these broads on my dick
I got bored of this shit
VVS diamonds
They keep the boy shining
These links on my neck look like water and shit
Send me a check
But don't check on me
Check out the views from my deck, it's just water and shit
The grass ain't greener on the other side
It's greener where you water
I've been watering shit
Breaking bread, I put an m into the team
Now every fiend around me boss and it's lit
Got the kerosene, I light the dark and the bottle girls runnin' sparklers
We been parked in the VIP
Politics don't want no part in it
My life's a movie, playin' every part in it
Like Eddie in Norbit
Bassy in orbit
Came to show you I'm the star in this bitch

Ain't one to beg
Gotta let you know
Say it with my chest
Just different and you know
A part of me still wants you
I guess I'll be here for you
If you come back
Never come back

I admire Buddhism
But, shit, I'm just sayin'
That once you go soul
You can never go back
Unless you believe in reincarnation
Don't question your faith
When I hit from the back
I ain't gon' lie
That vagina nirvana
Think I thought that I was Cobain up in that
Like I wrote Gone Insane up in that
We was supposed to be longterm
Guess our mentalities didn't match
Your new niggas no equivalent

Bitch, you flunking in math
How you go from the sun to a match?
You're still on my mind
Least my brain still attached
Still watching my story from your Finsta
You ain't know I knew that you had
I'm a Pisces
I know I'm a catch
I'm charming
And diamonds dance on every charm on my neck
Said you could do bad all by yourself
Who bad is that?
'Cause now I'm performing Do Better for all of my fans for the bag
Sorry, not sorry this time
Guess you'll learn on your own like an autodidact
To keep your word and not use autocorrect
I still wish you the best though
That's all I got to say about that
Soul
