

# Light Years

Basia Bulat

Do you remember your dancing days  
Nights when you would stay out till dawn  
Starstruck and young  
When you thought that you could know  
What's here and what is already gone

When you've gone light years  
Light years from your hometown  
Light years from a road  
Going anywhere you know

Someday when you're light years  
Light years from your love  
Light years from someone  
Anyone that you know  
You will still belong  
No matter how far you've gone  
Moonlight calling  
Stardust falling off of your clothes  
Night's getting colder  
Moonlight feeling  
Every night your dreams getting older

Then you go light years  
Light years from your hometown  
Light years from a road  
Going anywhere you know  
Suddenly you're light years  
How long were you falling?  
Light years shine you on  
You will still belong

No matter how far you've gone  
No matter how far you've gone  
No matter how far you've gone  
No matter how far you've gone

Suddenly you're light years  
Light years from your hometown  
Light years from a road  
Going anywhere you know  
Someday when you're light years  
How long were you falling?  
Light years shine you on  
And you will still belong

No matter how far you've gone  
No matter how far you've gone

No matter how long you lost track of time  
When you're out of your mind  
In the loneliest night you still belong  
No matter how far you've gone
