

My Angel

Basia Bulat

Intro

My angel

Verse 1

Turn to me when I whisper with a smile
Could you be my angel?
Startling to me how you read my mind
How you know me so well

Refrain

Could you be my angel?
You could be my angel this time
Here in the moment when you know it's me
The way you're holding me could save my life

Verse 2

Turning it under a microscope
How it seems atomic
Feeling it in all my blood I know
Our love came from nothing

Refrain

Our love came from nothing
Now it's changing all space and time
Here in the moment when you know it's me
Whispering like poetry divine

Chorus

How did I live without you? I need to take my time
Feeling you on my shoulder, letting the world go on
Here are the dreams I wanted, hearing the message
Taking a breath in, love never ending
Oh, feels like a bird just flying by

Refrain

Could you be my angel?
You could be my angel this time
Here in the moment when you know it's me
Whispering like poetry divine

Chorus

How did I live without you? All of this love is mine
Feeling you on my shoulder, letting the world go on
These are the dreams I wanted
Taking a breath in
Oh, it's like a bird just flying by
How did I live without you? All of this love is mine
Feeling you on my shoulder, letting the world go on
Singing me through the darkness, hearing the message
Love never ending, taking a breath in
Oh, it's like a bird just flying by

Outro

Turn to me when I whisper with a smile
You could be my angel
Turn to me when I whisper with a smile
Could you be my angel?
