

## Two Islands

Basia

When you're feeling lost and lonely  
And when people treat you coldly  
Close your eyes - you're right there

when you think there's nothing up there  
When a doubt becomes a nightmare  
Close your eyes - you're right there

you can escape this place  
You can forget this place  
Anywhere's better, kinder, brighter  
Two islands  
Two islands  
They'll take you to their hearts  
My islands

nowhere so peaceful  
Nowhere as blissful  
I will always remember my two islands with love  
They will never grow old

when your week is made of Mondays  
When your road is going sideways  
Close your eyes - you're right there

when you swim against the current  
And your arms are getting tired  
Close your eyes - you're right there

you can escape this place  
You can forget this place  
Anywhere's better, kinder, brighter  
Two islands, two islands  
They wait for me  
I know my islands

nowhere so peaceful  
Nowhere as blissful  
I will always remember my two islands with love  
They will never grow old

they came to us for a reason  
Leaving memories we can lean on  
Close your eyes - you're right there

one day if I go to heaven  
We will be again together  
Far away from here  
My two islands wait for me
