## **Two Islands**

When you're feeling lost and lonely And when people treat you coldly Close your eyes - you're right there

when you think there's nothing up there When a doubt becomes a nightmare Close your eyes - you're right there

you can escape this place You can forget this place Anywhere's better, kinder, brighter Two islands Two islands They'll take you to their hearts My islands

nowhere so peaceful Nowhere as blissful I will always remember my two islands with love They will never grow old

when your week is made of mondays When your road is going sideways Close your eyes - you're right there

when you swim against the current And your arms are getting tired Close your eyes - you're right there

you can escape this place You can forget this place Anywhere's better, kinder, brighter Two islands, two islands They wait for me I know my islands

nowhere so peaceful Nowhere as blissful I will always remember my two islands with love They will never grow old

they came to us for a reason Leaving memories we can lean on Close your eyes - you're right there

one day if I go to heaven We will be again together Far away from here My two islands wait for me
