

Take a breath
Don't you worry
Don't forget
All the scars
Make you just who you are
And you're beautiful

You put your heart into it
So hard you hit the ground
So done trying but what if
Your next try is the one
That's gonna make you fly

I'm gonna drive through the night
Into the sun, don't you know
I'm gonna steer the wheels
Back to where we belong
And you can tell me where to go
Anytime but sit back and relax
'Cause, babe, tonight I'll take you home
I will take you home, home, home, home
I will take you home, home, home, home
I will take you home, home, home, home

You put your heart into it
So hard you hit the ground
So done trying but what if
Your next try is the one
That's gonna make you fly

I'm gonna drive through the night
Into the sun, don't you know
I'm gonna steer the wheels
Back to where we belong
And you can tell me where to go
Anytime but sit back and relax
'Cause, babe, tonight I'll take you home
I will take you home, home, home, home
I will take you home, home, home, home
I will take you home, home, home, home

(I will take you...
I will take you...
I will take you...
I will take you...
I will take you...)
