

Rock This Planet

Batmobile

We hopped on a saucer we're making some speed
A guitar aboard that's what we need
Making our way through the galaxy
We're gonna bring down the stars just wait and see

Rock this planet, rock it real soon, jump on a rocket and rock
on the moon
And when we're done with this lunar-
rock we're gonna fly to mars and give them a shock

Picked up a passenger on Mercury
With three red eyes staring at mee
Between his steel teeth he grunted take me to the hop
Where my six rubber legs will dance to the bop

Rock this planet, rock it real soon, jump on a rocket and rock
on the moon
And when we're done with this lunar-
rock we're gonna fly to mars and give them a shock

We're heading for Saturn in our space-cadillac
Fly along the stars we're never coming back
Don't ever try to make us stay around
Even a meteorshower can't back us down

Rock this planet, rock it real soon, jump on a rocket and rock
on the moon
And when we're done with this lunar-
rock we're gonna fly to mars and give them a shock

Now we've finally done all the Milky-way
But we've not finished our rockin' days
Steer in that black-hole wait and see
We're gonna rock and roll in a next galaxy

Rock this planet, rock it real soon, jump on a rocket and rock
on the moon
And when we're done with this lunar-
rock we're gonna fly to mars and give them a shock

Rock this planet, rock it real soon, jump on a rocket and rock
on the moon
And when we're done with this lunar-
rock we're gonna fly to mars and give them a shock
