

## Soho

Bay City Rollers

Did you walk down the imaginary lover  
Were you there on the right down on the backstreet guys  
So it's a left on the right side of the litter  
It's a bitch when the hive and the make-up drags  
What a drag

It was last night in Soho I was dancing  
Last night in Soho you were there  
Then the light comes down and you hear the sound  
Of your things not there, you're my last to care  
It was last night in Soho I was dancing  
(Last night in Soho it was)  
Last night in Soho I was dancing  
(Last night in Soho it was)  
Last night in Soho you were there  
Easy come, easy go, let it ride in the city

Don't you know it's the talk of the backrow boys  
There's a face and it's more than infatuation  
I don't care what you say  
You just need your choice from the backrow boys  
So you can take your choice  
When my hands fall down you just turn around  
And you take the blame you just play that game

It was last night in Soho I was dancing  
(Last night in Soho it was)  
Last night in Soho you were there

Then the light goes down and you hear the sound  
Of the broken glass, it could never last

It was last night in Soho I was dancing  
(Last night in Soho it was)  
Last night in Soho you were there  
(Last night in Soho it was)  
Last night in Soho you were there
