

Vocabulary

Bay Faction

I am driving through my sentences
Like I've stolen my vocabulary
She just sat there, breaking all the news
And I just listened, pretending like I was in, into you
I'm not into you, I swear

I'll take my heart back, she'll take her time
I'll take this stone back
That used to be mine, that used to be mine
That used to be mine, that used to be mine

Baby, I'm trying to wade through all of this
But you won't stop crying
And all the demons inside your head
They're inside your head, I know

I'll take my heart back, she'll take her time
I'll take this stone back
That used to be mine, that used to be mine
That used to be mine, that used to be mine

I am driving through my sentences
