

Changing

Bay Ledges

Running so fast, hope I get there someday
Looking way back, always taking the long way
Running so fast, hope I get there someday
Looking way back, always taking the long way
Running so fast, hope I get there someday
Looking way back, always taking the long way
Running so fast, hope I get there someday
Looking way back, always taking the long way

Feel the summer
Get too long
Packing up and moving on
Shed some new light on this sad old song
And I fell asleep sitting in the backseat
And your clothes keep slipping into my dreams
And I know these are the things to ignore
And if you can't talk, I don't want the texting
'Cus I can't tell if we mean the same thing
It's a waste of time and life is too short

I think I'm changing
And I keep hoping that you'll change your mind
Times are changing
And I don't wanna leave you behind
Can I change your mind?

Running so fast, hope I get there someday
Looking way back, always taking the long way
Running so fast, hope I get there someday
Looking way back, always taking the long way

All the ways that we went wrong
All the words came out too strong
Shed some daylight on this sad old song
And I'm on the other side of the country
But I can feel your gaze weighing on me
(Looking way back, always taking the long way)

I think I'm changing
And I keep hoping that you'll change your mind
Times are changing
And I don't wanna leave you behind
Can I change your mind?

Running so fast, hope I get there someday
Looking way back, always taking the long way
(Can I change your mind?)

Running so fast
Hope I get there someday
Looking way back, way back
The long way
(Can I change your mind?)

Running so fast
Hope I get there someday
Looking way back, always taking the long way

(Whatever you want)

Running so fast
Hope I get there someday
Looking way back, way back, the long way
(Whatever you want)

Fell asleep sitting in the back seat
And your clothes keep slipping into my dreams
(Fell asleep sitting in the back seat
And your clothes keep slipping into my dreams)

(Whatever you want)
