

Light Me Up

Bayside

I'm somewhat of a ghost when I walk in a room
And you're commanding the crowd doing what you do
I still can't believe you gave to me this moment
And suddenly I appear when appearing with you

Be as it may, connect or not I'm glad I took my shot

You light me up
You light me up
You are the movie and maybe I can play a part
You light me up
You light me up
You are the sky and maybe I can be a star
You light me up

I don't have to be cool, 'cause I got what I need
I don't need to impress anybody I meet
'Cause I got someone by which I judge all others
You metaphorically sweep me off my literal feet

Be as it may, connect or not I'm glad I took my shot

You light me up
You light me up
You are the movie and maybe I can play a part
You light me up
You light me up
You are the sky and maybe I can be a star
You light me up

Last night I asked the moonlight
To kindly stall the sun I need some time before he comes
Because my nerves have got all my words strapped
Tightly to my tongue and we've only just begun

You light me up
You light me up
You are the movie and maybe I can play a part
You light me up
You light me up
You are the sky and maybe I can be a star
You light me up...
