

# Come Thru

Bazanji

Ooh, yea-yeah

Baby, now you should just come through  
You already know what I wanna do  
Ain't nobody else I'd rather choose  
Anything you want, I got for you  
Baby, now you should just come through  
You already know what I wanna do  
Livin' like there's no time to lose  
Anything you want, I got for you  
Baby, now you should just come through

Yeah, sometimes I feel alone  
I'm livin' by myself  
But this house not a home without you baby  
Keep it true baby  
I been wonderin' what you been out here doin' lately  
You got the [?] to  
I hope you been gettin' ready  
To come and see me, don't tag me  
Remember when you first met me?  
We in Miami, making marries  
You the only one who really understand me  
Don't play with my heart, I've been broken before  
Just say it from the start, I won't ask no more  
I don't wanna be a part, I just want you close  
So hear what I'm saying

Baby, now you should just come through  
You already know what I wanna do  
Ain't nobody else I'd rather choose  
Anything you want, I got for you  
Baby, now you should just come through  
You already know what I wanna do  
Livin' like there's no time to lose  
Anything you want, I got for you  
Baby, now you should just come through

Come and take a ride with me  
You don't look the one that's gonna lie to me  
When you tell me that you're busy, I'm not trippin' now  
I just hope that you don't make a foll out of me  
I know you and my friends don't get along  
But without you and them, I'd be alone  
We can work through it all, no problem  
Give me one chance, anytime, I solve 'em  
I know that you young, gotta live a little  
I never hold you back, I'ma kick it with you  
Don't break my trust, I won't say too much  
I be thinking

Baby, now you should just come through  
You already know what I wanna do  
Ain't nobody else I'd rather choose  
Anything you want, I got for you  
Baby, now you should just come through  
You already know what I wanna do

Livin' like there's no time to lose  
Anything you want, I got for you  
Baby, now you should just come through
