

Fine

Bazanji

They wonder how I been I tell em I'm fine
Feeling myself I'm doing it right this time
Never get rest I'm staying up late all night
Everything not so good but I know that's life
You ain't gotta worry bout me just know I'll be alright

Life isn't perfect but I make it work
Thinking bout the past make the good times worse
Helped a lot of people now I put myself first
Thinking bout my life it's a gift and a curse
Three in the morning and I'm writing this verse
If I don't take care I'mma end up in a hearse
Or maybe in a Lamborghini Urus
I'd rather be myself than tryna be the coolest
I don't need validation from the web
That's what the money do every time I check
When I be alone I be feeling my best
Please don't call my cell phone I would rather see a text
And leave it on read
I ain't got time to be talking all day
You ain't gotta ask I'm doing okay
Every time they see me now

They wonder how I been I tell em I'm fine
Feeling myself I'm doing it right this time
Never get rest I'm staying up late all night
Everything not so good but I know that's life
You ain't gotta worry bout me just know I'll be alright

Had to leave the old me to make room to grow
People close to me were hurting me the most
In the dark times are when it really shows
Say they love to see me win but they hate it on the low
What a time to live all the hate in the air
Everybody cool when they getting their share
When you running low then they don't really care
Now I lost all my trust I can't find it anywhere
I don't wanna live thinking bout if they really my friends
Or they see me in a Benz and they hoping I'mma spend
All the new money for em
Now I'd rather just be alone in a foreign
Got a lotta thoughts that I keep to myself
I did it on my own with the hand I was dealt
It's the truth but everybody telling me lies

They wonder how I been I tell em I'm fine
Feeling myself I'm doing it right this time
Never get rest I'm staying up late all night
Everything not so good but I know that's life
You ain't gotta worry bout me just know I'll be alright
