

High Road

Bazanji

They all in my lane
But we not the same
I been on the high road
I'm living on ten
I did it again
They don't know what I know
All of my soldiers they been riding with me
Came from the bottom we made us a milli
Hop on the plane
Wherever I land
I'm switching my time zone

I don't got a label, I been independent
They not at my table, not touching my bread and
I did everything that I said would
I been a star but I didn't go Hollywood
I'm in Miami where everything sunny
The women be thicker
My liquor be muddy
And they used to laugh but the only thing funny
Is when I be laughing my way to go make a deposit
Want it then Imma go cop it
Not in the Migos but Imma take off like a rocket
They want the clout but I want the money, they switching the topic
Are you not entertained
They been on the bench, I been in the game
Made a couple M's and I'm still the same
I won't ever change
Got the same people from the early days
I'm gone

They all in my lane
But we not the same
I been on the high road
I'm living on ten
I did it again
They don't know what I know
All of my soldiers they been riding with me
Came from the bottom we made us a milli
Hop on the plane
Wherever I land
I'm switching my time zone

They thought I was falling off, said I was finished
I'll never forget it but they not forgiven
And I used to dream it now I really live it
I'm climbing my way I won't stop for a minute
I've been on do not disturb
My family good and I gave 'em my word
No matter what happens I get what they asking
And let 'em know all of their futures secured
You not in my pedigree
I'm coming for those who ahead of me
My story been written I'm playing my role
Won't switch up my narrative Imma just let it be
I been the goat
Believe in myself when they won't

They think I'm cocky I'm confident though
Made it this far got a long way to go
And I been looking down on the demons below

They all in my lane
But we not the same
I been on the high road
I'm living on ten
I did it again
They don't know what I know
All of my soldiers they been riding with me
Came from the bottom we made us a milli
Hop on the plane
Wherever I land
I'm switching my time zone
