

# Look Out!

Bazanji

Aye  
They wanna try me  
They putting me under pressure, I turn it diamonds  
Hot as wasabi  
Every song that I'm dropping you hearing the sirens  
I had to go and decide  
The money or fame and I made up my mind  
I'm living my life on the low  
They do as they told  
I do what I want I'm alive  
The summer is 'bout to be over  
But you know I still be bringing the heat  
I be the player and I be the owner  
Ain't no decision if I don't agree  
Look at my life and it's hard to believe  
I made it this far but I gotta achieve  
A lot of my goals that I set when I started out  
Back when nobody was following me  
I'm 'bout to go to another level  
I'm not competing for silver medals  
I want the gold, I get what I'm owed  
I did it my way and I never been signed to the devil

Look out!  
I'm coming in hot when I touch down  
I put in that work when the sun down  
They wanted to hate but I'm up now  
What's up now?  
You see me  
I'm one of a kind won't beat me  
I'm running it back for a TD  
No they cannot play in my league  
Believe me

I been getting my bread, I can't be doing no keto  
I used to buy designer clothing just to boost my ego  
I'm back in the game with a reload  
I been on top like Al Pacino  
And I been doing this shit no cheat code  
From way back when they all had Tivo  
I could see the vision when I would imagine  
A better life for my friends and fam  
And I made it happen  
Soul searching I found a genie like I'm Aladdin  
Aye, I got a passion  
For proving them wrong when they used to be laughing  
These rappers I'm lapping  
And I'm busy working while they be relaxing  
My legacy lasting  
I stayed in my lane and now I'm never crashing  
If they want to challenge  
I'm putting they body inside of a casket

Look out!  
I'm coming in hot when I touch down  
I put in that work when the sun down  
They wanted to hate but I'm up now

What's up now?  
You see me  
I'm one of a kind won't beat me  
I'm running it back for a TD  
No they cannot play in my league  
Believe me
