

Ride With Me

Bazanji

Yea-yeah

You been acting like a stranger, said you'd see me later
But you never call back, I been getting faded
Running out of patience, but I know it's alright
I'll just keep on waiting 'til you come

Ride with me, ride with me, girl
You can vibe with me, vibe with me, girl
Touch the sky with me, fly with me, girl
You're too pretty for these other guys
We gon' have some fun tonight

You can just call me up
Tell me when you're ready and I'm pulling up
Waiting outside in a blacked out Benz
Busy for the night, just tell your friends
Anything you want and you know I got it
Everything on me, don't reach for your pocket
I know you're a good girl, never do you wrong
Living in my own world busy making songs
Thinking 'bout you everyday
Wishing that everything would go my way
But I been searching and searching again
I'm looking for love, I'm not looking for friends
Wondering if you really might be the one
You know that you're perfect, you shine like the sun
You making me chase, and you know that I'll run
I'm never gon' stop 'til I stop having fun, aye

You been acting like a stranger, said you'd see me later
But you never call back, I been getting faded
Running out of patience, but I know it's alright
I'll just keep on waiting 'til you come

Ride with me, ride with me, girl
You can vibe with me, vibe with me, girl
Touch the sky with me, fly with me, girl
You're too pretty for these other guys
We gon' have some fun tonight

You were gone for a bit, but you're back now
I was acting up, but I'm still down
I been working on myself these days
Forget about the past, I changed my ways
Focused on living, thinking 'bout life
Running from the past, turning wrongs into rights
Nobody's perfect, give me a chance
Listen to Drake, all I want is one dance
Play the game, I wanna play it again
And I ain't the same, don't make me say it again
'Cause I'm done with the old news
And I know that you're done with your old dudes
Always tryna coach you
You were looking for a light in the dark, girl
'Cause you had it all right from the start, girl
I don't know why we still been apart, girl
I been just fine, tryna follow my heart, girl, aye

You been acting like a stranger, said you'd see me later
But you never call back, I been getting faded
Running out of patience, but I know it's alright
I'll just keep on waiting 'til you come

Ride with me, ride with me, girl
You can vibe with me, vibe with me, girl
Touch the sky with me, fly with me, girl
You're too pretty for these other guys
We gon' have some fun tonight
