

Wake Up

Bazanji

Riding round town with the top down
West coast girl but she home now
I wanna make love with you
I wanna wake up with you, ah yeah
We staying up late till the morning
See the sun rise and we on it
I wanna make love with you
I wanna wake up with you, ah yeah

She living out west but she from the east
I told her I needed her company
'Cause she the only one who really knows
Everything I go through tryna make it in the industry
And lately I been stressed out
But she told me slow down boy, you know that you blessed now
She really got a way with the words
They be hitting me right like she been my missing piece

She call the post mates for her plate now
But you the only one I wanna take out
We gonna take it slow for the night
Doing everything you like
And I'm never gonna fade out
I'll be right here till the morning
You're looking kinda cute when you snoring
But baby just tell me what you want
And I'll get it all done, 'cause nothing's more important

Riding round town with the top down
West coast girl but she home now
I wanna make love with you, I wanna wake up with you, ah yeah
We staying up late till the morning
See the sun rise till we on it
I wanna make love with you, I wanna wake up with you, ah yeah

Known you for a while but it's like we just met
This a new time but we acting like when
The music didn't make a change in my life
Now it's VIP, everything, all night
Took you to the game and we hit the show too
Maybe next time, we can hit no boo
And I know you want me, not the money now
I been feeling so hot, never coming down

Thinking 'bout the next time I see you
These others girls couldn't ever be you
'Cause they ain't really got it like that
You are 101 girl, you just popping like that, oh yeah
Wishing I could just fly out
But this life got me tied down
Gotta stay home for a minute
But I'm coming back soon and we gonna just ride out

Riding round town with the top down
West coast girl but she home now
I wanna make love with you, I wanna wake up with you, ah yeah
We staying up late till the morning

See the sun rise till we on it

I wanna make love with you, I wanna wake up with you, ah yeah
