In the dark
The seven stars laugh as they dance
WW:BE begins, now is the time
A flashing silhouette, a voice calling for you

"It's that easy." God calls my name
Whose game is this?
It's my turn, no waiting
Pain into gain, I'm thankful for it all
Rewriting fate is my way
Baby, I chosen one
This stage is the whole universe
You must be crazy
Every peak resets my basic

Time paradox, the whole world's in the mix
Which will it be? Eeny, meeny, miny, heaven
Oh, oh (Oh, oh)
Oh, oh (Oh, oh)

Now you fade to black
Spacecraft's watching you
Turn all that common sense upside down
Step this way we "invisible seven"
Oh, oh (Oh, oh)
Oh, oh (Oh, oh)
Now you fade to black
Now you fade to black

No matter the struggle, there's no mercy
Caution up ahead
One glance at a momentary flash
Black hole, suck you in
I gather every sense into my hands
Your eyes, ears, and into your dreams

Drops that stain from past to future
As you want, just realize and write it here
The dream you chase is the mission I live
Far off, you see α and β , but I'm already at Ω
Look up, we on the spacecraft

Time paradox, the whole world's in the mix
Which will it be? Eeny, meeny, miny, heaven
Oh, oh (Oh, oh)
Oh, oh (Oh, oh)
Now you fade to black
Spacecraft's watching you

Pretend to understand, a stupid response
Pick your jaw up off the ground
A little fear is good, no need to hold back
Even doubt is sweet as we move into the unknown
Do I look like I've lost my way?
What's normal? Only God can judge me, judge you

Time paradox, ha-ha
Which will it be? Hell or Heaven?
