

Did you ever listen with the music missin'  
Turn your radio on  
When the trees are swaying and the band is playing  
Our favorite song

Shelter from the sunlight  
Shelter from the cold night

Just where I wanna be  
Baby just you and me  
Staying at home

Summertime, take a few calls, make a little love  
Thank God for shelter

I'll give you shelter from the storm  
And a house to keep you warm  
I'll give you shelter through the night  
And a chance to make this right

Do you ever still think of me  
And the way that we used to be  
When the world was just you and me  
Hanging out in our shelter

Now it's two o'clock  
Lines around the block  
Waiting for the parade  
When the dark of night  
Or the bright sunlight  
Has you runnin' for shade

Together we can run and hide  
Maybe we can stay inside

Just where I wanna be  
Baby just you and me  
Staying at home

Summertime, take a few calls, make a little love  
Thank God for shelter

I'll give you shelter from the storm  
And a house to keep you warm  
I'll give you shelter through the night  
And a chance to make this right

Do you ever still think of me  
And the way that we used to be  
When the world was just you and me  
Hanging out in our shelter

Do you think that you'd ever stay  
Take a page out of yesterday  
If we could only find a way  
Hanging out in our shelter
