## **Strange World**

On Santa Monica city pier We watch the people who gather here The uninvited who've lost their way And now we're all here to stay

And it's a strange world There's nothing to it Strange world I'm getting through it Strange world Thinking it over It's a strange world after all

Multi-colourful lives we run To catch a glimpse of the setting sun I can't imagine how life would be If you were not here with me

And it's a strange world There's nothing to it Strange world I'm getting through it Strange world Strange world after all

Sunday morning Skies so blue Yo te amo Means I love you

You can drive your car To the county fair Or ride your bicycle anywhere It doesn't matter that much to me Cause we're pretty good company

And it's a strange world There's nothing to it Strange world I'm getting through it Strange world Thinking it over It's a strange world after all **Beach Boys**
