

## Fire Escape

## Beach Bunny

Paralyzed, it's contagious  
You got the world hangin' on your lips  
Life's gentle, painless  
An automatic prerogative  
Hypnotized, it's voracious  
I try to grasp at your golden glare  
Life's fragile, patient  
Broken glass flyin' through the air

Humanize your equation  
I'd like to be your remedy  
Swallow, slowly  
I feel your heartbeat in everything  
Visualize at the station  
I took the train to the great escape  
Of New York, subway system  
I carve the car seat with both our names

My heart is tipping over  
Pouring out when you say  
Gravity couldn't sway  
Any place is the place I'll be  
When you're far away
