

## Wildflower

Beach House

No better color  
Look everywhere  
We're driving home every night  
The shadows stay by your side

You built a city  
All in your head  
Triangle of every light  
It turns you on every night

Need a companion  
My head in prayer  
You know you're not losing your mind  
What's left you make something of it  
Sky what's left above it  
The way you want nothing of it  
Baby I'm yours

No better color  
Look everywhere  
You built a city  
All in your head  
You know you're not losing your mind  
What's left you make something of it  
Sky what's left above it  
The way you want nothing of it  
Wildflower
