

## Stardust

## Beach Weather

Was there something in the stars  
That kept you awake?  
Shining for days  
Was I meant to break apart  
Or glow in the dark?  
Always a constant lunar phase

In a past life I would bathe in your light  
I could feel you day and night

You're turning to stardust, baby  
Want you but it's harder to stay  
Honest  
Promise I'll keep running away  
And in the afterglow you can watch me fade  
You can watch me fade  
Turning to stardust  
Turning to stardust

Was it something from the start  
That pulled you away?  
Your gravity of heartbreak  
If I had infinite arms to hold you

In a past life I would bathe in your light  
I could feel you day and night

You're turning to stardust, baby  
Want you but it's harder to stay  
Honest  
Promise I'll keep running away  
And in the afterglow you can watch me fade  
You can watch me fade  
Turning to stardust  
Turning to stardust

Is it written in the stars?  
Our constellation?  
Black-hole conversations

Is it written in the stars?  
Our constellation?  
Black-hole conversations

Is it written in the stars?  
Our constellation?  
Black-hole conversations  
Are burning me out  
Are burning me out  
Are burning me

Turning to stardust  
Turning to stardust  
Turning to stardust  
Turning to stardust

You're turning to stardust, baby

Want you but it's harder to stay  
Honest  
Promise I'll keep running away  
And in the afterglow you can watch me fade  
You can watch me fade  
Turning to stardust  
Turning to stardust

Turning to stardust  
Turning to stardust

Turning to stardust  
Turning to stardust
