

Float Away

Bearings

Truth is I don't hate this but I think that I have strayed
From the things I thought that I would want, it's time to make
a play
And maybe I'm just tired from always falling on the knife
But there's something so enticing bout a simple sorta life
Oh yeah

Everybody says the same damn thing
Nothing lasts forever gotta bring me down from outer space
Houston has called the mission
Is anybody listening?
Float away to the same damn place, same damn place

Feel the weight of the world as we circle around
It was yours, it was mine, now we're all slowing down
I got lost through the years, I should've told you
Things have changed, know it's strange but I need mine too

Everybody says the same damn thing
Nothing lasts forever gotta bring me down from outer space
Houston has called the mission
Is anybody listening?
Float away to the same damn place

Will I miss this?
Now be honest with me
Did we make it further out
Then we were supposed to?

Everybody says the same damn thing
Nothing lasts forever gotta bring me down from outer space
Houston has called the mission
Is anybody listening?
Float away to the same damn place

Everybody says the same damn thing
Nothing lasts forever gotta bring me down from outer space
Houston has called the mission
Is anybody listening?
Float away to the same damn place
