

Burnout

Beartooth

I want free,
I want changed,
I want it written on my grave,
and no the stone's not gonna read liar
that died living in his cage

I'm sick of being angry at all the wrong things
Keeping my head down to get through another day
How much time have I spent
yelling at people that don't exist

I'm sick of being hopeless at all the wrong times
Living a letdown, living a lie
I can't be wrong. Not this time

I just wanna live free
They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out

It's really getting old writing negative songs,
beating myself up to get another word out
How much time have I lost yelling
About all the pain I feel

There's gotta be an answer gotta be a fix
Find the pieces, take the risk
I won't go down not like this

I just wanna live free
They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out

You'll never burn me out

(Live free) They won't get the best of me
(Live free) I don't need your sympathy

(Live free) They won't get the best of me
(Live free) I don't need your sympathy
You may spark the flame
But these scars will not remain
You'll never burn me out

You'll never burn me
