

Dominate (Live from The Journey Below)

Beartooth

Lead us to the cliff
The shapes begin to shift
Stripped us of our reasoning
Pushed in the abyss
Look at how we change
Our darkness grows to hate
The spark becomes a blaze
We're all about to dominate

I've been turned into a vapor
The world has left my feet
I'm pushing through the structure
My DNA's been cleaned
I am one with the outliers
No death is in my way
My system's been upgraded
And I'm finally breaking free

(We're all about to dominate)

Time to separate the weakest part of me
Realigning till I find a way to dominate
No more carrying the weight of anything
Realigning till I find a way to dominate

It's so blinding in the darkness
So lost yet stuck in place
The beings are surrounding
Examining my face
Taking pieces of my body
Expanding in my mind
The flood is overwhelming
But I'm learning how to thrive

(We're all about to dominate)

Time to separate the weakest part of me
Realigning till I find a way to dominate
No more carrying the weight of anything
Realigning till I find a way to dominate

I'm tied down by the needles in my skin
When I return I'll be stronger than I've ever been

Time to separate the weakest part of me
Realigning till I find a way to dominate
No more carrying the weight of anything
Realigning till I find a way to dominate

Find a way to dominate
Find a way to dominate
Find a way to dominate
Find a way to dominate
