

# Me In My Own Head

Beartooth

If there's a problem then go and fix it  
It's such a simple phrase but I can't grasp it  
I lay awake at night  
With the fear of dying if I close my eyes

What's the point of existence  
With this incurable sickness  
Just show me the door  
Give me a place to rest

What I would give to sleep my life away  
I'd never feel alone again  
And yet it's still the same when I'm dreaming  
Cause at the end of the day it's just me in my own head

I may never know  
Just how deep the rabbit hole goes  
Medication won't solve it  
But I guess it's a solution till I find the true culprit

What's the point of existence  
With this incurable sickness  
Just show me the door  
Give me a place to rest

What I would give to sleep my life away  
I'd never feel alone again  
And yet it's still the same when I'm dreaming  
Cause at the end of the day it's just me in my own head

It's just me in my own head

What I would give to sleep my life away  
I'd never feel alone again  
And yet it's still the same when I'm dreaming, it's just me

What I would give to sleep my life away  
I'd never feel alone again  
And yet it's still the same when I'm dreaming  
Cause at the end of the day it's just me in my own head

It's just me in my own head
