

Never Back Down (Noise/Beartooth demo)

Beartooth

Blegh!

I'll never need another thing, for my friends, and my family
Why did you deter me, you lied to my face, where's your honesty
?

I stand for loyalty, honesty, commanding respect
You're always going to be dead to me, but me and my friends will
live on

I'm watching the hands on the clock,
As you're dragging the chains through the path that you walked
Through the blood in your veins, and now I see that nothing
Nothing will change your ways
And follow me to a place where you'll be safe
The house of doubt, isn't hardest to find in times like this we
voice our fate

When will you shut your mouth, because this time there's no way
out
It's time to clean up your face and show me what you're made of
I'll never back down!
I'm never gonna back down from you
Cause my friends have my back through and through
Through and through

I am not afraid, things will never change
Everyone now is a coward
One foot under the spotlight
But the constant struggle will never end
The constant struggle will never end
