

Young

Beartooth

Play loud play fast and you'll never die young

I got my very first record
Was in an all black sleeve
I Took it home to the player
Turn it up till my eardrums bleed
I was struck by the thunder
Stuck In the pouring rain
That's when I found out the secret

Play loud play fast and you'll never die young

You'll never die young

Play loud play fast and you'll never die young

Let it go
Turn it up, turn it up, turn it up

I get high on the voltage
Rock n roll in my blood
I've only learned one lesson
Play loud play fast and you'll never die young

You'll never die young

You'll never die young

Play loud play fast and you'll never die young

You'll never die young

You'll never die young

Play loud play fast and you'll never die young
