

Centaur

Beaver

you burned all my ships
now you're burning inside me
heat on my heels
you drive me ahead

smoke fills my lungs
& the gap that's dividing

when I spread out my arm
I rise high on lysergic heat
I look on down & I laugh out loud
at this man in need

I'm wading upstream
through crystal clear water
saturate me
let me drink from your well

the path I have cut
closes behind me
deeper & deeper
I go into the woods

seeking my source
the womb I have come from

when I spread out my arm
I rise high on lysergic heat
I look on down & I laugh out loud
at this man in need
I look on down & I laugh out loud
oh that man is me

I'm wading upstream
through crystal clear water
saturate me
let me drink from your well
