

Back To My Love

Becky Hill

Had to hide myself away
Had to get it down on paper
Kept making the same mistakes
Maybe it's just in my nature
Trust me, I know how it looks
You know I don't give a fuck
Don't feel sorry for me
But if I have time to breathe
I start to think of what I'm missing

Back to my love
Got to know me before I know what I want
I'm back to my love
Just a few things I gotta overcome
Oh, just a few things I gotta overcome
Back to my love
Just a few things I gotta overcome
Back to my love
Just a few things I gotta overcome

It doesn't really bother me
Just as long as I'm kept busy
I wouldn't say that I'm lonely
Just as long as I'm in company
I just need a little time
I promise you that I'm just fine
Don't feel sorry for me
But if I have space to think (space to think)
I start to notice what I'm missing

Back to my love
Got to know me before I know what I want
I'm back to my love
Just a few things I gotta overcome
Ohhh, just a few things I gotta overcome
Back to my love
Just a few things I gotta overcome
Back to my love
Just a few things I gotta overcome

Can't be two if you've never been one
If you've never been one, if you've never been one
Can't be two if you've never been one
If you've never been one, if you've never been one

Oh, how could Simz ever be two?
I'm as unique as it gets man, how could Simz ever be you?
Hella staring when they see me, haven't you ever seen truth?
Might have been sent here only for you to admire this view
As you should, I been so misunderstood
I got space tomorrow, would stay there for good
If I could, if I lead, will you follow?
We just might get lost, but so what?
Start to think outside the box
Ain't no limits where I'm from
I just gotta get back...

Back to my love
Got to know me before I know what I want
I'm back to my love
Just a few things I gotta overcome
Oh, just a few things I gotta overcome
(Got to overcome, got to, got to get back)
Just a few things I gotta overcome
Back to my love
Just a few things I gotta overcome

Got to get back, got to overcome, got to
