

Breakdown

Becky Hill

You only see me once a week
Greeted by a kiss on my cheek
Miles from how we used to be
When we fell in love

You don't take responsibility
All our problems put on me
Is this how we've always been
When we fell in love

Oh, it's the typical cliché
Ending bad when we started off great, they tell me
Are we okay

Oh, is this what you want, babe
We were reading from the same page, tell me
Is it too late

So when did it all break down
Feeling like it's over any minute now, now
When did it all break down
Tryna picture life when you're not around, around

How did we get so far away
We were buying a house to stay in
We still talk but it's not the same
Just how we fell in love

And I will do anything to save us
Cause we were steel when we turned to rust
And I can feel that we're losing trust
And us being in love

Oh, it's the typical cliché
Ending bad when we started off great, they tell me
Are we okay

Oh, is this what you want, babe
We were reading from the same page, tell me
Is it too late

So when did it all break down
Feeling like it's over any minute now, now
When did it all break down
Tryna picture life when you're not around, around

Don't know how it felt so right, feeling wrong
Have we felt this all along
I don't want to make you stay, but I'm not sure anymore

So when did it all break down
Feeling like it's over any minute now, now
