

Red Lights

Beddy Rays

At times, I don't fit in
Just light a cigarette
Look how cool it is
Breathe it in and let's forget
It's not impossible
Kicked every obstacle
I stumble and fall
I got myself back against the wall

Someday I might regret
Bug in a spiderweb
I'm tangled to death
And holding on to what is left
Red lights light up the dash
While trying not to crash
I'll take these problems
And bake them in the solvent

Time be good to me
I'm taking the slow route
All that I know now
Time is all I need
Now we're on our own now
Maybe we'll find our feet

It's not impossible
Kicked every obstacle
I stumble and fall
And catch myself back against the wall
Red lights light up the dash
While trying not to crash
I'll take these problems
And learn how to solve them

Time be good to me
I'm taking the slow route
All that I know now
Time is all I need
Now we're on our own now
Maybe we'll find our feet

Now we're on our own now
Maybe we'll find our feet

Now we're on our own now
Maybe we'll find our feet
