

Sway

Buddy Rays

Home alone with the door closed
Write another song, different chords though
Lay awake, in my bedroom
You're a melody I'm tryna get to

I don't mind
I don't mind
If you got plans around tonight
I don't mind
If you've got the time
There's just a few bands I think you'd like

Then we started drinking
Out on your patio
Then we caught a cab in
And you pulled me to the front row

Just as the music cues...
The lights light up and your eyes do too...
I love the way you move...
How your shoulders sway...
How your shoulders sway
When I'm next to you, yeah

Halfway home now we're in the streets
Lost your phone we can barely see
As we walk by the river
I'll help you if you look after me

And we started linking
On the long way home
Then you froze my thinking
And you showed me what I don't know

Just as the music cues...
The lights light up and your eyes do too...
I love the way you move...
How your shoulders sway...
How your shoulders sway
When I'm next to you, yeah

We share the music that we discover
Best way to get to know one another
This is the feeling I can't deny
I could get used to time after time

Just as the music cues...
The lights light up and your eyes do too...
I love the way you move...
How your shoulders sway...
How your shoulders sway
When I'm next to you, yeah
