

Vices gripping hard around my heart  
Overthink everything the fastest way to fall apart  
Never thought someone could take my soul  
Her beauty magnified her eyes, waves on a steady roll

You're in the front of my head  
I'm at the back of your mind  
We're at the top of the truth  
And the bottom of a lie  
I feel we're falling between  
I'm falling further behind  
What I know is right

Vices gripping harder on my heart  
I'm working overtime to find a way to form a path  
What is for the best and what's to grow?  
I'm looking further now, behind me is what I used to know

You're in the front of my head  
I'm at the back of your mind  
We're at the top of the truth  
And the bottom of a lie  
I feel we're falling between  
I'm falling further behind  
What I know is right
