

# May You Be The Road

Bedouin Soundclash

The road we walk is glittered in gold  
Some might be a friend and some might be a foe  
If I come in from the cold would you be my road?  
May you be my road? May you be the road

Trouble like a fist in the land  
Beating to the heart of a man  
Love is all you need in the end  
But you finally get something else

Cause the road we walk is glittered in gold  
Some might be a friend and some be a foe  
If I come in from the cold would you be my road?  
May you be the road? May you be the road

Sorta like we all searched before  
Looking under old scars and stones  
Darlin don't you feel so alone  
Together we can both build a home

The road we walk is glittered in gold  
Some might be a friend and some be a foe  
When I come in from the cold would you be my road?  
Will you be my road? May you be the road  
will you be the road?
