

# You Never Leave Me

Bedouine

Sleepers on the bench  
Racing in the street  
My face is at the glass  
Never missing a beat  
In the velvet gutter  
You can get real low  
But you're the freest kind  
Because you know  
We're just here to wander  
Don't have nowhere to go

The sleepless ocean  
The timeless shore  
Here before me and when I'm no more  
You can't take your gold  
When you cross that door  
Of a sawtooth coast  
To the ocean floor  
You're just here to wander  
Don't have nowhere to go

And even on other side of the world  
You're right beneath me  
You can feel so far but you never are  
You never leave me  
You never leave me

Sweet and tough  
The shore wind blows  
The lighthouse light  
Like a UFO  
Do you see those clouds?  
They are just like us  
They get light and dark  
And then dissolve  
They're just here to wander  
Don't have nowhere to go

And even on other side of the world  
You're right beneath me  
You can feel so far but you never are  
You never leave me  
You never leave me

I can't sleep sometimes  
When I'm on my own  
And when you're here  
We stay up till dawn  
Your crooked smile  
Your crooked lips  
I don't need to sleep  
After taking a sip

Those clouds are us  
They are always up  
They come together  
They blow apart

I'm empty now  
As I should be  
All I need now  
Is to feel free  
We're just here to wander  
Don't have nowhere to go

And even on other side of the world  
You're right beneath me  
You can feel so far but you never are  
You never leave me  
Even on other side of the world  
You're right beneath me
