

Angela

Bee Gees

Angela, I'm still alive
Angela, I'm still alive
The sun and the sea
The darkness in the way
All the pain don't get no better
It gets stronger every day

It happens to be true
That I still pray to you my love
Voices in the night, don't help
My searching for the truth, my love

And when I'm lost
And high above the storm
I hear your name
I'm empty inside, I'm empty inside
And where are you

Angela, I'm still alive
For the two of us
I'm still alive
You've got to imagine us
All the world was on our side
We had the power of the universe
And we were ready
We were ready for the ride

Moonlight in her hair
Her eyes the wonder of the age
But all I mean to you my love
Is just a spotlight on an empty stage

And through it all
One fire in the rain
Keeps burning on, keeps burning on
I can't stop my heart
It's beating for you
Reaching for you
But you are gone
I'm empty inside, I'm empty inside
And where are you

Angela, I'm still alive
For the two of us
I'm still alive
Angela, I'm still alive
Angela, I'm still alive
Angela, I'm still alive
