

# I Can't See Nobody

Bee Gees

Em D C# B

1. I walk the lonely streets  
I watch the people passing by  
I used to smile and say hello  
Yes, I was just a happy guy
- Then you happened, girl  
This feeling that possesses me  
I just can't move myself  
I guess it all just had to be

R: I can't see nobody  
No, I can't see nobody  
My eyes can only look at you  
You

2. I used to have a brain  
I used to think of many things  
I watched the falling rain  
And listened to the sweet bird sing
- Don't ask me why, little girl  
I love you and that's all I can say  
You're every, every breath that I take  
You are my nights, my night and day

R:

3. Every single word you hear, girl  
Is coming from this heart of mine  
I've never felt like this before  
A love like yours, so young and fine

And now as I try to forget you  
It doesn't work out anyway  
I loved you such a long time ago  
Though in my eyes you'll always stay

Every single word you hear  
Is coming from this heart of mine  
I loved you such a long time ago

Don't know why, girl I don't know why  
(Baby, such a long time  
Baby, such a long time  
Baby, such a long time)

R: (2x)
