

# The Chance of Love

Bee Gees

You and me we're both the same  
In this life a lonely game  
I used to be a happy man  
And now I understand just what it's all about  
I never had a doubt on the chance of love

As a boy I lived down here  
I always saw you near  
To be together was happiness  
And I just can't forget the moment we first kissed  
I'd like to try again on the chance of love

Yeah, on the chance of love  
I'll do anything to get you by my side  
On the sound of love I will love you girl  
You'll be mine

All the world would then be free  
An apple falls from an apple tree  
You and I will be together  
And you will understand when I take your hand  
I'll open up the door to the chance of love
