

## Same Sun

Before You Exit

I can't be the only one  
Who still believes with everything  
The best is yet to come

I can't be the only one  
Who wants to see a world  
Where every daughter, every son

Flood these streets with harmony and love

We're all under the same sun  
We go until the days done  
So maybe just for once  
We could try to be one  
We're all under the same sun

You are not the only one  
Who has their days where every dream  
Is hard to carry on

Know that it takes only one  
To bring upon a change  
For every color, old and young

Hear them sing with melody and love

We're all under the same sun  
We go until the days done  
So maybe just for once  
We could try to be one  
We're all under the same sun

Just look up  
Don't close your mind  
It's all alright  
It's all alright

Just look up  
No don't you cry  
It's all alright  
It's alright

We're all under the same sun  
It don't matter where you're from  
So maybe just for once  
We could try to be one  
We're all under the same sun
