

A New Generation

beFour

You're the voice of a new generation
And you're coming out so strong
It's your choice, can you feel the sensation?
You're going one by one

The battle of life, in every sight,
Is won when you have friends forever
And you better believe it, 'cause you can achieve it
As long as you are two together

Make every step and take what you get,
But don't forget the chance of giving
Yes, you are a young gun, a glorious someone
Let's go and change the world

You're the voice of a new generation
And you're coming out so strong
It's your choice, can you feel the sensation?
You're going one by one

So let's make history
Together and forever
let's make history
I feel it's now or never

This song is for you and it is so true
Just keep it in your heart forever
In every nation, the new generation
Has come to change the world

You're the voice of a new generation
And you're coming out so strong
It's your choice, can you feel the sensation?
You're going one by one

So let's make history
Together and forever
let's make history
I feel it's now or never

You're the voice of a new generation
And you're coming out so strong
It's your choice, can you feel the sensation?
You're going one by one

So let's make history
Together and forever
let's make history
I feel it's now or never

Let's make history
Together and forever
Let's make history
I feel it's now or never
