

What do you know about me
Why do you keep me underground
While green flag soldiers are entering my town

Too much concerned about the lead
Noble ideas left behind
How do you dare to raise your voice up to stars

Don't believe of what you hear
That's what these liars, all these liars did
Don't believe of what you see
That's what these liars did to me

What do you care what I would
When you don't mind what I say
I guess I think enough to choose it my way

Get it off that's what you should
Let us live for one day
The best day ever I found my reason to stay

Don't believe of what you hear
That's what these liars, all these liars did
Don't believe of what you see
That's what these liars did to me

Without you, without me the sun will keep on shining on Calgary
Cold tomorrow, hot yesterday, the sky will flow above 'em anywa
y
Without you, without me the sun will keep on shining on Calgary
If you don't stand for the world's debris than come with me, co
me with me

Don't believe of what you hear
That's what these liars, all these liars did
Don't believe of what you see
That's what these liars did to me

Without you, without me the sun will keep on shining on Calgary
Cold tomorrow, hot yesterday, the sky will flow above 'em anywa
y
Without you, without me the sun will keep on shining on Calgary
If you don't stand for the world's debris than come with me, co
me with me
