

Belong Right Here

BEKA

I know you imagine
A day where you could up and leave
Where you would just go out to sea
Thinking they'd never miss me
But what you don't remember
Is we'd be standing on your shore
As you weather every storm
Parting seas to get to you

Slam another door shut
Empty out your lungs
Tell us where you're hurting
We'll find the medicine
Even on my worst day I'd drop everything for you
No matter what you've been going through
You belong right here
You belong right here
Even on my worst day I'd drop everything for you
No matter what you've been going through

You could take the credit
You could put I in team
You could say you think I'm ugly
Pray for rain on all my birthdays
But no matter what I'd always pick you
No matter what I'd always pick you

Slam another door shut
Empty out your lungs
Tell us where you're hurting
We'll find the medicine
Even on my worst day I'd drop everything for you
No matter what you've been going through

You belong right here
You belong right here
Even on my worst day I'd drop everything for you
No matter what you've been going through
