

# You Got

BEKA

Fist clenched as we sat on the park, watching the march  
You told me about your pops  
And how, he couldn't take responsibility for  
The pain that you felt when he left you and your mum  
Eyes shut as she's braiding at your hair, tells you it's care  
Things aren't always gonna be fair  
And how, if you work hard, you can channel that hurt  
Into something that might actually help someone  
She said

I'm gonna love you the way nobody else will  
I'm gonna love you so you know  
I'm gonna love you the way nobody will  
I'm gonna love you so you know

You got the kinda eyes that can see in the dark  
The kinda light that puts hope into hearts  
You got the kinda liberation that gets contagious  
The kinda energy that is gonna change us  
You got the kinda of freedom that you catch on a breeze  
The kind of change that you start on your knees  
You got the kinda spirit that they'll write about  
The kinda strength that overcomes the doubts

Big man that's your new name now  
Head in the clouds  
You can't come down  
Everybody saw you win that fight  
But oh your muscles and mind are tired  
Head's down as he says he's proud  
Never had doubts  
Knew you wouldn't follow the crowd  
And son you need to know that your beautiful heart  
Is something that might actually help  
Someone  
He said

I'm gonna love you the way nobody else will  
I'm gonna love you so you know  
I'm gonna love you the way nobody will  
I'm gonna love you so you know

You got the kinda eyes that can see in the dark  
The kinda light that puts hope into hearts  
You got the kinda liberation that gets contagious  
The kinda energy that is gonna change us  
You got the kinda of freedom that you catch on a breeze  
The kind of change that you start on your knees  
You got the kinda spirit that they'll write about  
The kinda strength that overcomes the doubts

You know you got the fire  
You know you got the fire  
You know you got the fire, the fire  
You know you got the fire  
You know you got the fire  
You know you got the fire, the fire

You got the kinda eyes that can see in the dark  
The kinda light that puts hope into hearts  
You got the kinda liberation that gets contagious  
The kinda energy that is gonna change us  
You got the kinda of freedom that you catch on a breeze  
The kind of change that you start on your knees  
You got the kinda spirit that they'll write about  
The kinda strength that overcomes the doubts
