

Fly Me to Eden

Bellamy Brothers

You are the girl who could make
My heart fly far away from here
Cos I knew my dreams

Would come true someday soon
And the day is near I believe in
The promise behind your love

And I trust in the power of love
It will take me from hell
Into paradise all the way...

I lived for so long
Both feet on the ground
But now I can't hear myself think

Fly me to eden with your love
I'll come with you
Fly me to eden with your love

My dreams come true
I always knew there would be
A miracle out in the blue

So, fly me to eden
With your love
I'll come with you.

Eden is there where
Two lovers can share
All there tenderness

And eden is there where
Some angel's take care
Make you safe from harm

It's not easy to find
Cos it's not nearby
And you need all your

Heart and your soul
But the magic of true love
Will make you fly, if you try

You are the girl who
Could change all my world
Oh baby this could be the night

Fly me to eden with your love
I'll come with you
Fly me to eden with your love

Our dreams come true
I always knew there would be
A miracle out in the blue

So, fly me to eden

With your love
I'll come with you

Fly fly me high
Your love is gone
I need tonight

Fly fly me high
Your love is gone
I need tonight

So, fly me to eden
With your love
I'll come with you

Fly me to eden
With your love
Our dreams come true

Fly me to eden
With your love
I'll come with you

Fly me to eden
With your love
Our dreams come true
